

TRUMP 2020

The Case for the Re-election of Donald J. Trump

By
Josh Y. Goldstein

INTRODUCTION

All the predictions of the 2016 election went against the current President, Donald J Trump, yet he proved all wrong and is now sitting in the Oval office. What made it possible? Is it the Russians?

The simple answer is No, and instead, it was the Americans, the brave souls from the land of the free, which made it possible. It was the people who were frustrated by the detrimental effects of liberal Globalization. It was Trump who had the vision of making America and its mainstream population great. And this particular vision made him the President of the most powerful Nation on Earth.

Now, as the time for another election approaches, it is high time for the American people to make yet another decision. Did Trump keep his promises? Is he the right person to Keep America Great? This book answers some critical questions on the eve of the 2020 election.

First, before moving further, you need to know why Americans chose Trump to run the country. The reason Trump got elected is that he gave people a vision. He gave the people of America hope. And his optimistic view and hope of making AMERICA GREAT AGAIN put him into the oval office.

Through the last couple of decades, mainstream Americans were frustrated. They paid a significant portion of taxes to their Government but had very little to show for it because of too much Globalization. The Jobs that once belonged to Americans were shipped overseas. And as the frustrations with day to day life reached its peak, Donald J Trump gave them hope. He promised to return the former glory Americans once knew.

With the 2020 election approaching, Trump's supporters are both asking and answering the following question: did Trump fulfill his promises? Well, in short, the answer is yes. Trump has been checking off the list; one fulfilled promise after another. "Total nonfarm employment grew by 6,027,000 since the president took office, according to the most recent figures available from the Bureau of Labor Statistics."¹ And the unemployment rate is 49 years low. Americans are starting to revive their former position in the Job Market.

The small local business was struggling before Trump took the presidency. But after passing the Tax Cuts and Jobs Act under the strong leadership of Donald Trump, things got better for the average American. The Act provided 82% of the middle-class families Tax relief and 20% Tax cut for the

small business as well. It was a much-needed reformation for the small business owners. President Donald Trump was not only focused on the local companies, but he also had plans to make the American companies competitive in the Global Market. And so, the corporate tax was cut from 35% to 21% to support this endeavor.

Before the election, many claimed the vision of Donald J Trump as biased to white Americans only, but his vision was for all the legal American citizens; this became quite evident in his first term. The Unemployment rate of most of the minorities in America like African Americans, Asian Americans, and Hispanics have reached historic lows, with more and more of them joining in the workforce.

The Women's economic empowerment, which is regarded as a critical parameter for Gender equity, was also a top priority in the Trump era. The Women's Global Development and Prosperity Initiative focus explicitly on including women in the global economy, hence the economic freedom of women through participation in the workforce.

Based on these facts, it is quite clear that President Trump was successful in fulfilling his promises and boosting the local American economy significantly. But his success was not confined within the borders of the United States. In the economic War with China, Trump's initiatives will play a pivotal role in retaining dominance in the world economy in the coming years.

China was misusing and practicing harmful acquisition of the U.S. technologies; Trump Administration took this into account and launched rigorous investigations under Section 301 of the Trade Act of 1974. Amongst many findings, this investigation revealed that China supported Cyber intrusions to expose critical information like trade secrets. In response to these misacts conducted by China, the USA, under the Trump administration, punished China through massive tariffs.

Apart from the China deal, Trump has been very effective in dealing and enacting several foreign policies regarding trade laws that serve the best interest of America. Through the United States-Mexico-Canada trade agreement, The NAFTA was renegotiated and revitalized. This negotiation gave an upper hand to the small business and farmers of the United States to flourish through active manufacturing, trade, and export. All the above facts prove that the term of President Trump was a complete economic success through the fulfillment of his promises.

The second most vital space where the Americans felt insecure was the rampant dominance of illegal immigrants in the heart of America. After the incident of 9/11, the fear became prominent. And of the past, the President did much to restrict the dominance of illegal immigrants. During his campaign, Donald Trump vowed to save Americans from the clutches of these people who are living in the country without legal papers.

Yes, America is the land of the free, and the whole continent is built by the hands of immigrants. But they had the vision to make America, whereas many illegal immigrants exploit its resources and pass lazy days living off the money paid by faithful taxpayers. President Trump took this matter seriously and placed strong policies to keep illegal immigrants away from the borders. At the same time, he made it very clear that America is the land of the brave and hardworking people. And whoever wants to comply with the real American value and contribute to the Nation is always welcome through the legal process of merit-based immigration.

A massive chunk of these illegal immigrants was related to the crime circles that conducted heinous crimes in the American land. President Trump wanted to keep these people from the American mainland through building a secure border, which he called THE WALL along the southern boundaries. As of now, the Trump administration has successfully got funding for 445 miles of the total 722 miles of the border wall.

In the year 2018, the U.S. Immigration and Customs Enforcement (ICE) removed 256,085 illegal immigrants from America and was equally active since President Donald Trump took office. Besides, through the launch of the office of Victims of Immigration Crime Engagement (VOICE), the American victims by the illegal immigrants were given proactive support. So, President Trump has completed his promise of safeguarding the legal Americans from the toxic clutches of the illegal immigrants, and these American friendly policies will give him an edge in the coming election of 2020.

America has always been the top country to contribute to keeping World Peace intact. The War against terrorism is one of its greatest fights. Besides, whenever any country became a threat to world peace, the USA is the first one to respond. President Trump played a vital role in both aspects; throughout his term, he was active against his battle with ISIS. The threats of North Korea and Iran were also dealt with very well.

Perhaps the greatest success of Donald Trump in his battle against terrorism is the elimination of the terrorist and chief leader of ISIS, Abu Al Baghdadi in 2019, in a successful military operation conducted by the USA.

The dealings with North Korea and Iran were also noteworthy actions by the Trump Administration. President Trump was the first U.S. president to enter North Korea. Trump met with Kim Jong Un in Singapore to begin the denuclearization process.

President Donald Trump also brought the USA out of the flawed nuclear deal with Iran. Moreover, in early January of 2020, a bold decision was made by the USA to eliminate the Quds Force leader Qasem Soleimani, who was the instigator of several operations in Syria, Lebanon, and throughout the Middle East. Above all, he had the blood of Americans and its allies on his hands. The retaliation of which was successfully taken by the Trump administration.

The USA has always played a role in retaining peace in the Middle East. With a view to this, President Trump brought out the Middle East Peace plan. Also, he supported the Israeli Government by moving the U.S. Embassy to Jerusalem on their decision to declare Jerusalem as the Capital.

President Donald Trump's vision was to make America great again. And the American military plays a vital role in maintaining its interest and safeguard American national security throughout the Globe. A massive budget of \$700 billion is included for military funding. Moreover, under the leadership of Donald Trump, the NATO Allies are spending \$69 billion more, which is making the Alliance stronger than ever before.

As an emissary of modern technological development, the United States Armed Forces got its sixth wing. The Space Force, which will be the guardian of American interest in space, will protect its outer space assets.

Americans longed for a change in its Law and order mechanism, and President Trump complied with the American's interest by strengthening it. He appointed Judges like Neil Gorsuch and Brett Kavanaugh to the Supreme Court to protect and remain loyal to the American constitution. Besides, President Trump had been rock hard against the corrupted officials, and since the start of his term, he never compromised with people who tried to bypass the law of the country and took active steps.

For the first time in six decades, the USA started to export natural gas. Also, the USA became one of the largest crude oil producers in the world under the Trump administration. The coal export has also soared by as high as 60%. The Trump Administration has been Veteran friendly and came up with the V.A. Accountability Act to protect the interests of the people who served the USA.

In spite of such success rate, the Democrats and the Anti-Trump campaign have been vigilant throughout the term of President Donald Trump. This book debunks several false claims by the Anti-Trump activists; besides, the success of Trump overshadows such allegations.

Americans were beset with a dilemma and uncertainty of Globalization for a long time.

Under these circumstances, President Trump gave hope, gave the vision to make America great again. And now, at the end of this first term, most of these promises are fulfilled. American interest was given priority and received importance in his policies. As the 2020 election approaches, the success of the Trump administration will resonate with his positive vision for America. It will drive more and more voters to give him another chance to Keep America Great.^{2,3,4,5}
